■ OLIS GLOBAL WORKS SOFTWARE PACKAGE	<u>\$895.00</u>
Comprehensive Windows 98/NT™ program for dynamic display and analysis of 2D and 3D data files collected as a function of time, temperature, titration, pressure, concentration, or other variable. Kinetics can be extracted from any wavelength by positioning cursor at that wavelength on the 3D spectral graph; overall kinetics and chemical results are returned following SVD and Matrix Exponentiation analysis. Data files up to megabytes in size are imported, plotted, and globally fitted in seconds. Easily the most powerful, precise, and fast algorithms ever developed for the computerized analysis and graphical handling of 2D or 3D files from all OLIS data acquisition programs. Other compatible files for import include HP™, Excel™, *.asc, *.bka, *.bkw, *.tim, *.csv, *.ols, *.spc, *.add, and *.sno, and a growing list of other types.	
■ SHIPPING AND HANDLING	<u>\$35.00</u>
